Bio

Engineer-cum-financier-cum-lecturer with
an entrepreneurial streak and thing for
energy risk and investments

What was your first job?

Aside for helping the family business when I was
15, I was hired by BP as a consultant in their
Exploration and Production Technology function.

What was your best job?

Growing a risk management and investment
business from 3 people to 65, all the while learning
from and coaching my team members.

What attracted you to mentoring?

Paying it back and paying it forward.

How do you see the future of start- up’s in Greece?

I think 10 years of austerity has shocked an
entire generation into an entrepreneurial
mindset. The next 10 years should see this shift
transform into a wave of activity.

What would you fill an empty pool with?

Water and children.
