end: then stop”**

Bio

Renewable energy professional with
experience spanning the life-cycle of RES
projects and focus on utility scale Solar PV
development. Also, Net Zero enthusiast

What was your first job?

As a student, taking part in wine exhibitions as a
representative of Nostos wines – a Cretan label
that still makes fantastic wine.

What was your best job?

The one I’m in now! I love the challenges that
travelling, exploring the world and doing business
in new countries bring, and I am happy I can
promote RES around the world.

What attracted you to mentoring?

The prospect of discussing about the future of
entrepreneurship and the earth with young
people with a fresh point of view.

How do you see the future of start- up’s in Greece?

Blindly bright! Start-ups have done well in Greece
even during the crisis. With the renewable
revolution upon us, the opportunities are there for
those who care to look.

What would you fill an empty pool with?

A non-Newtonian fluid so I can walk across and
look cool.
